AGC and Onyx Solar Create Marketing Alliance to Promote Photovoltaic Glass Architectural glass with the ability of generating energy

Alpharetta, GA. September 5, 2014 – AGC Glass Company North America announces a strategic marketing alliance with Onyx Solar to promote photovoltaic glass. Onyx Solar produces Building Integrated Photovoltaics as part of a range of multi-functional constructive solutions. Also available as insulating glass units, this photovoltaic glass captures both optic and thermal performance components in one product—providing clean, free energy, utilizing the power of the sun.

This architectonic glass supports the increasing requirements for energy conservation, and the long term goal of reaching zero energy in buildings. “We believe the Onyx Solar products are a good complement to our offering of high performance low-e coatings to the North American market, allowing our architectural team to present the most innovative glazing solutions to the architectural community.” stated Serge Martin, VP of Marketing.

AGC and Onyx Solar will be showcasing these products during the GlassBuild America trade event in Las Vegas, September 9-11—booth #1021 and #1216. To learn more visit www.onyx solar.com.
