

Two New Hires at Acurlite Structural Skylights

Acurlite Structural Skylights a heavy-duty commercial skylight manufacturer from Berwick, PA has expanded its work force by hiring two new employees. Due to an increase in sales and project size, Acurlite has found the need to expand their engineering and project management departments to help service their customers. The new employees are Jeff Heffner (Engineering) and Todd Kern (Project Manager). Acurlite is proud to welcome Jeff and Todd to the Acurlite Team.

Jeff Heffner (Commercial Designer) is a graduate of Lincoln Technology and has 5 years structural and miscellaneous steel background. Jeff also has extensive skylight background and worked in the modular home industry for 3 years. Jeff's role at Acurlite will be engineering layouts for commercial skylights, material requisitions and glass sizing for manufacturing. Jeff brings a great amount of industry and technical knowledge to Acurlite and will prove to be a great asset.

Todd Kern (Project Manager) is a graduate of Bloomsburg University and has over two decades in the commercial and residential construction business. Todd's prior positions held him responsible for commercial and residential modular projects from inception to completion. Todd's role at Acurlite will be project management. Todd will over see commercial skylight projects after the sales process through engineering, manufacturing, delivery and installation. Todd brings a great amount of project management knowledge to Acurlite and will prove to be a great asset.
