

Sevasa introduces the new line CriSamar® STEP, an acid etched glass with deep engraving that creates a perfect anti-slip effect.

The new CriSamar® Steps is composed by 5 designs: Incus, Aluminum, Nexus, Versus and Codex, in two different versions, satin etched and transparent to adapt to new modern trends. These 5 designs can be mixed with a wide range of colored glass creating a universe of creative possibilities.

Sevasa is not only extending their product line by introducing satin etched anti slip glass in floors but offering a wide range of new designs, transparencies and sizes.

CriSamar® STEP offers pioneering solutions of high added value and quality to architects and decorators. CriSamar® STEP is applicable in all interior and exterior passage areas. Ideal for stairs, footbridges and floors.

Sevasa is specialized in the production of acid etched satin engraved glass obtained from flat glass sheets. The company was founded in 1983 by Don Pasquale Meli after a long tradition in both the artistic glass sector and satin etched glass sector of the 60's in Italy. Creator of a new procedure for serial decorative glass, he set up an important company. SEVASA with headquarter in Barcelona and several international branches.

Sevasa is recognised internationally for its products and their applications in architecture (exterior architecture, stairs, catwalk, flooring, ...) furniture and decoration (top counter, doors, partition screens, ...).

Service, quality and design are its strong points. Sevasa exports 80% of its production thanks to its international recognition gained through its quality, and has branch and representative offices in Europe, America and Asia.

Sevasa is showing its commitment with the environment. Strict standard controls give Sevasa the seal of an eco-friendly and sustainable company.

Products:

- **Acid-etched glass: SatenGlas®, SatenLux®, Luxmat®** : 3 levels of opacity and finishing that allow you to choose the level of luminosity and light diffusion, smooth to the touch, brilliance, satin-resistant and an antireflection effect for the most versatile applications.

- **CriSamar®** : engraved glass, transparent or translucent. Known for its quality and the depth of the cut, it has a brightness and lightness that is impossible to obtain in any other transformation process.

- **SatenDecor®** : decorated acid-etched glass, with designs of different styles. Designs that communicate with us through their shapes and the smoothness of their texture.

Press Release

23rd May 2007
