**Guardian's DiamondGuard High Endurance Glass Line
to be Featured at NeoCon**

Auburn Hills, Mich., June 2, 2011 – Guardian Industries announced today the introduction to interior designers of its DiamondGuard High Endurance Glass. The products will be among the Guardian InGlass solutions for interior designers to be exhibited at NeoCon, June 13-15 at the Merchandise Mart in Chicago (Booth 7-6046).

All glass starts out beautiful; ours stays that way. DiamondGuard's scratch resistant, low maintenance, highly transparent quality makes it perfect for interior design applications including tabletops, cabinets, shelving, furniture, wall panel, doors, partitions store fixtures, display cases and mirrors.

Guardian DiamondGuard glass is permanently fused with the strength of carbon. It has an extremely low coefficient of friction that permanently protects it from scratching, smudging and hazing. Made using Guardian's patented vacuum deposition process DiamondGuard glass is 10 times more scratch resistant than regular glass, prolonging the life and beauty of glass in a variety of interior applications. Guardian developed DiamondGuard in response to the requests in the industry for a more durable glass product that makes it the perfect choice for high traffic areas.

MGM Grand in Las Vegas used Guardian DiamondGuard for their new display cases. A great product for high traffic areas because of its scratch resistance and durability.

"Interior designers want their products to last," said Diane Turnwall, Guardian Interiors market segment director. "DiamondGuard resists scratching from everyday contact with items such as keys, jewelry, silverware, briefcases and handbags. Its endurance in the real world redefines the possibilities for glass."

DiamondGuard is true environmental stewardship because high endurance glass minimizes the need for costly replacements.

The new Guardian InGlass brand includes a new and comprehensive glass portfolio and online tools for architects and designers. The first of its kind in the industry, Guardian InGlass brings together Guardian's entire interior product line to allow designers the opportunity to experience the varieties of glass in one place.
