### **EFCO Introduces New Energy Efficient, Impact Resistant Storefront**

MONETT, Mo. – Adding another cutting-edge product to its lineup, EFCO officially unveiled its new Series 526 Thermal Impact Storefront today.

"The Series 526 Storefront is one of our most versatile products, and we are excited to release it to the market," said Dave Hewitt, EFCO director of sales and marketing. "It proves that the balance between aesthetics, performance and security can be struck."

Designed to accommodate 1-5/16" insulating glass units for enhanced U- values, the Series 526 incorporates the use of a polyurethane thermal barrier that enhances the frame's CRF values. Dry-glazed interior and exterior gaskets eliminates the usage of any structural silicone sealants, and provides enhanced thermal performance by ensuring a high-quality weather seal.

Series 526 also utilizes screw-spline frame construction for decreased shop fabrication labor, allowing ladders to be built prior to installation, reducing field labor cost.

In addition, the Series 526 meets large- and small-missile impact standards and can be used with a variety of EFCO entrance packages. In fact, the integral door adaptors make it compatible with all EFCO entrance doors, while the availability of outside- and inside-glazed configurations increases versatility.

For more information or to order the Series 526 Storefront or any of EFCO's products, please visit [www.efcocorp.com](http://www.efcocorp.com) or call 1-800-221-4169.

#### **About EFCO**

A Pella company, EFCO is one of the world's leading manufacturers of architectural aluminum windows, curtain walls, storefronts and entrance systems for commercial architectural applications. Headquartered in Monett, Missouri, its vertically integrated manufacturing process provides careers for more than 1,600 skilled employees to ensure quality at every step. Focusing on providing innovative customer solutions to design challenges, while adhering to budgets and other project concerns, EFCO's background includes everything from historical replication to cutting-edge new construction. EFCO is dedicated to supporting the building community with products, services and programs that promote outstanding commercial design.
