

Horst Mertes Joins FeneTech Glass Processing Effort

FeneTech, Inc., has hired Horst Mertes to expand its offerings and services to glass processors in North America and overseas. Mertes is an industry software specialist with more than 25 years international experience. He started June 2 as senior business developer for the newly launched FeneVision Glass ERP solution.

“Hiring Horst is a symbol of our commitment to offer quality solutions and services to the glass industry in North America and world-wide,” said Ron Crawl, president of FeneTech.

In addition to his industry experience, Mertes is fluent in seven languages. He is well known to the North American and international glass industry through his long association with a large European supplier of glass and window manufacturing software.

FeneTech, Inc., is based in Aurora, Ohio. The company provides and supports integrated and intelligent software solutions for window, door, sunroom and glass processing applications. For more information, contact Ron Crawl at 330-995-2830, Horst Mertes at (330) 696-1864 or visit www.fenetech.com.
