

FeneTech wins “Best Emerging Company” at the BEST OF TECH AWARDS 2011

Aurora/Ohio based software specialist FeneTech Inc. was honored to receive this award during a ceremony held in downtown Cleveland on Thursday, May 19th 2011, organized by the Northeast Ohio Software Association (NEOSA).

NEOSA is an industry-led, industry-driven organization made up of over 900 technology companies from all facets of Northeast Ohio’s information technology sector.

Ron Crawl, President of FeneTech Inc. states: “We are extremely proud to have received this award. Northeast Ohio has a very diverse and growing technology community. To be recognized by our peers for the excellent work that we do all over the world is extremely satisfying for our entire team.”

The Best Emerging Company honor is awarded based on the company’s growth rate of both revenue and clients over the past three years and more importantly the ability of the company to continue on that growth curve.

Crawl states “Our growth has been fueled by our entry into the international market. In the last two years we have deployed our software in five different languages in more than ten countries. The opening of our Luxembourg office last year displays our long term commitment to doing business around the globe.”

Horst Mertes, Director of Global Sales states “In my more than 25 years in software sales I have never been associated with a company that is so dedicated to deliver innovative and functional solutions to their customers while putting such a focus on customer satisfaction. I have a high degree of confidence that FeneTech’s growth is just now starting.”

In addition to winning this award, FeneTech’s FeneVision software was a finalist in the Best Software Product category.
