## **GANA Names New Insulating Division Educational Seminar Chairman**

(TOPEKA) - The Glass Association of North America (GANA), an international trade association of commercial glass and glazing manufacturers, fabricators and glazing contractors, announced Jon Kimberlain of Dow Corning Corporation has been named the new Insulating Division Educational Seminar Chairman. Kimberlain replaces Bill O'Brien, also of Dow Corning Corporation, who served in the position for four years. The position represents the GANA Insulating Division on the annual Glass Fabrication Educational Seminar's program planning committee.

"Jon will be an excellent representative of the Insulating Division in the planning and development of this important industry educational event," said Greg Carney, GANA's Technical Director. "This key position is instrumental in providing vital educational information to those who are new to the commercial architectural glass and glazing industry."

Kimberlain has been with Dow Corning Corporation for over eight years, the majority of which was involved in engineering for the processing of silicone sealants. His current role with Dow Corning Corporation is as a Technical Service Engineer, in which he supports silicone sealants in the glass and glazing industry. Prior to his work with Dow Corning, he worked as an engineer for the Gates Rubber Company. He received his Bachelor of Science degree in Chemical Engineering from the University of Kentucky. He and his wife have one child.

"I appreciate the opportunity to serve GANA and the Insulating Division," said Kimberlain. "Glass Fabrication is the premier educational event for commercial glass fabricators, and I look forward to help continue its reputation for excellence and quality."
