GANA VIDEOS NOW AVAILABLE ON DVD

(TOPEKA) - Three Glass Association of North America (GANA)-produced videos on the creation of various types of commercial architectural glass are now for sale on DVD. The videos are:

- The Float Glass Manufacturing Process (produced by the Flat Glass Manufacturing Division)
- How Mirrors Are Made (produced by the Mirror Division)
- How Laminated Glass Is Made with PVB (produced by the Laminating Division.)

Each video is priced at \$35 for GANA members and educational institutions, and \$300 for non-members. The videos may all be seen in their entirety for free on the GANA website at www.glasswebsite.com/video.

"The videos have been seen several thousand times online," said Brian Pitman, Director of Marketing and Communications for GANA. "We have received multiple requests to purchase the videos, and now we are able to offer that ability to those interested parties."

Work is being done on more videos, which are produced in-house by GANA staff in conjunction with each Division. Current videos in production include one on insulating glass units, a video featuring tempered glass, and additional laminating videos featuring other interlayer technologies.

###

The Glass Association of North America provides the organizational structure for addressing the needs of a diverse membership. Comprised of the Building Envelope Contractors, Decorative, Flat Glass Manufacturing, Insulating, Laminating, Mirror and Tempering Divisions and an Affiliate Classification, GANA provides a forum for exchanging information and ideas and presenting a unified voice on matters affecting the glass industry and for developing the management and technical sophistication needed to remain competitive in a constantly changing business environment.
