ANA RELEASES 19TH GLASS INFORMATIONAL BULLETIN

(TOPEKA) - The Glass Association of North America (ANA) announced today the release of its 19th Glass Informational Bulletin (GIB), a series of educational documents available to the industry as a free download on their website. Titled *Approximate Weight of Architectural Flat Glass*, the GIB provides approximate weights of architectural flat glass by thickness designations as published by North American manufacturers.

“Calculating the weight of architectural flat glass is a question that our staff receives on a weekly basis,” said Ashley Charest, Account Executive for ANA. “This newest Glass Informational Bulletin will be an extremely helpful guide to design professionals, wall system manufacturers, and construction managers when needing an approximate weight for glass used in their projects.”

Since their original creation, ANA’s Glass Information Bulletins have been downloaded over a quarter million times from the website at www.glasswebsite.com. Visitors to the site’s TechCenter will be able to add this GIB to their library beginning today.

#

The Glass Association of North America provides the organizational structure for addressing the needs of a diverse membership. Comprised of the Building Envelope Contractors, Decorative, Flat Glass Manufacturing, Insulating, Laminating, Mirror and Tempering Divisions and an Affiliate Classification, ANA provides a forum for exchanging information and ideas and presenting a unified voice on matters affecting the glass industry and for developing the management and technical sophistication needed to remain competitive in a constantly changing business environment.
