GANA Announces New AIA-Accredited Presentation on Glass Coatings

(TOPEKA) - The Glass Association of North America (GANA) announced today a new presentation accredited by the American Institute of Architects (AIA) with one learning unit toward continuing education in the architectural field. Titled "Coated Glass", the presentation looks at the history and technology behind glass coatings, as well as applications and enhancements, specifically in the realm of energy efficiency.

"The Flat Glass Manufacturing Division's Education Committee has done an excellent job with this presentation," said Ashley Charest, Account Executive for GANA. "This is their second accredited presentation, and its release is very timely with the increasing awareness for energy efficient technologies."

The presentation examines various technologies and applications, as well as cost savings to buildings that utilize coated glazing in the structure. To request a presentation for your firm or company, or to become a certified facilitator for the presentation, please contact GANA Headquarters at (785) 271-0208, or email Charest directly at ashley@glasswebsite.com.

###

The Glass Association of North America provides the organizational structure for addressing the needs of a diverse membership. Comprised of the Building Envelope Contractors, Decorative, Flat Glass Manufacturing, Insulating, Laminating, Mirror and Tempering Divisions and an Affiliate Classification, GANA provides a forum for exchanging information and ideas and presenting a unified voice on matters affecting the glass industry and for developing the management and technical sophistication needed to remain competitive in a constantly changing business environment.
