ANA RELEASES 15TH GLASS INFORMATIONAL BULLETIN

(TOPEKA) - The Glass Association of North America's (ANA) today announced the release of their 15th Glass Informational Bulletin (GIB), a series of educational documents available to the industry as a free download on their website. Titled "Describing Architectural Glass Constructions," the GIB gives a visual representation of many common glazing configurations in the industry.

"Our newest informational bulletin is focused on providing architects and glazing contractors a best practice method of describing architectural glass constructions in project specifications and construction documents," said Greg Carney, ANA's Technical Director. "Text descriptions are supported by illustrations to help visualize the product descriptions."

Since their original creation, ANA's Glass Information Bulletins have been downloaded over a quarter million times from the website at www.glasswebsite.com. Visitors to the site's TechCenter will be able to add this GIB to their library beginning today.

###

The Glass Association of North America provides the organizational structure for addressing the needs of a diverse membership. Comprised of the Building Envelope Contractors, Decorative, Flat Glass Manufacturing, Insulating, Laminating, Mirror and Tempering Divisions and an Affiliate Classification, ANA provides a forum for exchanging information and ideas and presenting a unified voice on matters affecting the glass industry and for developing the management and technical sophistication needed to remain competitive in a constantly changing business environment.
