GlasWeld Attends Glass Doctor's 2008 National Conference in Nashville
Celebrates third year as Glass Doctor's Exclusive Glass Repair Equipment Provider

28 January 2008 (Nashville, TN) – GlasWeld, an Oregon-based complete solutions provider for the glass repair industry, announced today that it is Glass Doctor's exclusive glass repair equipment supplier for the third consecutive year. GlasWeld will be displaying and selling its Glass Doctor-branded repair equipment and supplies at the Glass Doctor Annual Conference being held in Nashville, TN this week.

“Delivering top quality equipment, services and support to Glass Doctor has always been our top priority, and we are very pleased to continue our relationship for the third year in a row,” said Mike Boyle, president of GlasWeld.

He continued, “Both of our companies share a commitment to excellence in glass repair, and are working together to raise awareness of the benefits of repair through Glass Doctor's network of more than 300 locations across the United States. Repair and restoration of all types of glass saves the consumer time and money and, collectively, results in a positive outcome for the environment.”

GlasWeld will be launching new technology at the show called the Rx3 Injector, based on the company's recently unveiled G3 ProVac which removes air and moisture prior to introducing resin in for windshield damage. GlasWeld's Glass Doctor exclusive RxFusion Auto Glass Repair System will be offered with the new Rx3 ProVac or the IV Infusion Injector using Cinch technology, depending on user preference. Other products offered for Glass Doctor include the RxForce Scratch Removal System, for removing damage without distortion, and the RxShield Stick protective glass coating product.

By combining its innovative equipment with training, customer support and environmental stewardship, GlasWeld gives glass technicians with a “fusion” approach to glass repair. This approach allows customers to receive all the resources needed for successful glass repairs, customer satisfaction and sustainability.

About GlasWeld

Based in Bend, Oregon, GlasWeld provides complete glass repair solutions—from revolutionary equipment to unparalleled training programs and technical support—for both flat glass and auto glass. The company's flagship *Gforce* Scratch Removal System for glass scratch removal and *G3fusion* Auto Glass Repair System for windshield repair are distributed worldwide through an international distribution network. GlasWeld's product lines have been developed based on decades of industry research, development and customer feedback. Because glass repair is intrinsically sustainable, GlasWeld has integrated creative, tangible environmental initiatives into its daily operations, including ongoing education for the greater glass industry.
