(TOPEKA) – Greg Carney, Technical Director for the Glass Association of North America (GANA), has been placed in the intensive care unit at Gulfport Memorial Hospital, in Gulfport, Miss., due to complications arising from congestive heart failure and is currently listed in critical condition. Currently, only family is permitted visitation, and items of support will not be delivered to Greg or his family at the hospital. With the outpouring of support from the glass industry, GANA officials ask that all correspondence be sent to the GANA office, where it will be passed on to Greg and his family.
