Guardian ShowerGuard glass to be featured on popular cable series

Auburn Hills, Mich., October 3, 2009 -- Guardian ShowerGuard, a glass product that uses a patented technology to resist corrosion, will be featured in an episode of "Bathtastic!", Sunday, Oct. 4 at 10:30 a.m. on the DIY Network.

Hosted by designer Matt Muenster, "Bathtastic!" features cutting-edge new materials, design tips and essential do-it-yourself know-how to help revitalize any bathroom. Guardian ShowerGuard was selected for the program because of its patented technology that seals the glass surface, stopping visible corrosion before it starts. ShowerGuard glass keeps shower glass looking as gorgeous as the day it is installed with easy cleaning.

"We're excited to have Bathtastic! viewers see the beauty and value of Guardian ShowerGuard," said Martin Powell, Guardian vice president of technical marketing. "Homeowners can enhance their bathroom with a beautiful glass shower with dramatically less dirt and soap build up."

The DIY Network will also be re-airing the episode. Check your local listings for re-run times throughout the next few weeks. To get the most updated BATHtastic! information, go to <http://www.diynetwork.com/bathtastic/show/index.html>.
