**Guardian launches Spanish edition of global website; enhances
www.guardian.com with new navigation and content**

For Immediate Release, December 6, 2012, Auburn Hills, Mich. -- Guardian Industries has enhanced its company website -- www.guardian.com -- with improved navigational tools and additional content, and added a new Spanish version.

Improved navigation of www.guardian.com allows visitors to easily search for products and solutions under the company's Glass, Automotive and Building Products sections. The expanded drop-down menus are intuitively organized in such a way that visitors will quickly find the glass, automotive trim or building product of their choice. Combining products with real world solutions and applications provides another avenue to quickly absorb the breadth of product diversity and how the products help meet the needs of our customer communities.

In addition, an expanded news section has been added to the company's three divisions so visitors can see the latest product news and events without having to navigate off the page.

The Spanish version is another enhancement that allows greater access to our products and services to a larger portion of the population.

"As a global organization, we have regional websites that cater to local customers but we know it's important to translate the overall Guardian site for our Spanish-speaking customers and prospects," said Earnest Thompson, director of global branding for Guardian Industries. "Websites must be dynamic so we'll continue to grow the site with new content and online services."

About Guardian Industries Corp.:

Guardian is a diversified global manufacturing company headquartered in Auburn Hills, Michigan, with leading positions in float glass, fabricated glass products, fiberglass insulation and other building materials for commercial, residential and automotive applications. Its automotive trim group, SRG Global Inc., is one of the world's largest suppliers of advanced, high value coatings on plastics. Through its Science & Technology Center, Guardian is at the forefront of innovation including development of high performance glass coatings and other advanced products. Guardian, its subsidiaries and affiliates employ 18,000 people and operate facilities throughout North America, Europe, South America, Asia, Africa and the Middle East. Visit www.guardian.com.
