Guardian Industries SunGuard App Update Expands Global Reach While Increasing Connectivity and User Engagement

Auburn Hills, Mich. (January 30, 2013) – Guardian recently introduced an enhanced version of its SunGuard app. The first of its kind in the industry, the Guardian SunGuard app allows architects, designers, builders, sales executives, glaziers and others to explore SunGuard’s innovative and energy-saving products, while interacting with hundreds of SunGuard projects on the go.

The update now features multiple languages, including: French, German, Hungarian, Italian, Polish, Portuguese, Russian and Spanish, and integrates the project databases from Guardian SunGuard sites around the world.

More projects have been added that can now be viewed in landscape or portrait with impressive high-res images and better mapping functionality. Those using the Guardian SunGuard app can now search for projects in another city anywhere around the world, beyond their current location. Before you could only search from where you were.

"Since launching the app last year, we have continued to engage our sales team, partners and customers in finding ways to improve the application and deliver more resources to those in the field," said Chris Dolan, Guardian’s director of commercial glass marketing.

"It's my job to feel the pulse of the glass industry, especially when it comes to what's new and what works. I've heard nothing but positive comments from the industry about the new SunGuard app and how it helps identify projects and products and give architects and designers information at their fingertips," said Industry Blogger Max Perilstein, founder of Sole Source Consultants. "In a mobile world, it's a timely solution."

With the new updates, North American users can now make a sample requests and email projects directly from their smartphone, tablet or other mobile device.

The Guardian SunGuard app can be found in Apple's App Store for the iPhone or iPad, and Google Play for Android phones, by searching for *Guardian SunGuard*.

Guardian SunGuard is high performance low-E coated glass for commercial applications that offers unprecedented solar control and is available in a wide variety of colors and performance levels.

About Guardian Industries Corp.:

Guardian is a diversified global manufacturing company headquartered in Auburn Hills, Michigan, with leading positions in float glass, fabricated glass products, fiberglass insulation and other building materials for commercial, residential and automotive applications.
