FOR IMMEDIATE RELEASE

ARCH TO ADD HEAT SOAK CAPABILITY

TAMARAC, FL- Arch Aluminum & Glass is pleased to announce the addition of nationwide Heat Soaking capability for its heat treated glass products.

“More and more everyday our customers are asking us about heat soaking, and in order to stay a True Single Source, we felt like we needed to do this.” commented Steve Perilstein, Vice President of Sales for Arch Aluminum & Glass.

While heat soaking glass does not give a 100% guarantee of the elimination of spontaneous breakage, it does statistically reduce the instances. The process of heat soaking includes heating tempered glass to a designated temperature for a specified amount of time. During this process any impurities in the raw glass would be found and the glass would have to be replaced.

Arch Aluminum & Glass will be the only fabricator with multiple locations in the US and Canada to offer this service.

Arch Aluminum is your *TRUE SINGLE SOURCE*® for Architectural Aluminum, Extrusions, Insulated, Tempered, Mirrors, Laminated, and Decorative Glass. Arch is an American-owned, family business founded in 1978. Arch now operates 32 facilities in 17 states with over 2200 employees.
