NFRC 2008 Founders Award **Presented to Hy-Lite® Products**

GREENSBORO, GA. – The National Fenestration Rating Council (NFRC) has presented Hy-Lite® Products with the organization’s 2008 Founders Award. The award recognizes manufacturers who have continuously participated in NFRC’s Product Certification Program since its inception in 1993.

“We appreciate the vision and leadership, along with time, energy and resource that Hy-Lite has displayed over the past 15 years by participating in our certification program,” says Jim Benney, executive director of the National Fenestration Rating Council. “Thanks to their dedication in bringing energy efficient products to the marketplace, Hy-Lite stands out as a leader in the fenestration industry. Their acrylic block and specialty decorative glass windows are shining examples of products conceived with energy concerns for homeowners in mind.”

The NFRC is a non-profit organization that administers the only uniform, independent rating and labeling system for the energy performance of windows, doors, skylights and attachment products. The NFRC Rating System uses computer simulation and physical testing by NFRC-accredited laboratories to establish performance ratings for fenestration products and product lines.

Hy-Lite offers more than 89,000 products on its on-line ordering system at www.hy-lite.com, including acrylic block windows, walls and door inserts, decorative glass windows and specialty windows. Windows are also available through Hy-Lite dealers.

Hy-Lite Products is an industry leader in prefabricated acrylic block products and specialty windows. Part of consumer products company Fortune Brands, Inc. (NYSE: FO), Hy-Lite manufactures a full line of operable and fixed acrylic block and decorative glass windows, radius walls, door insert units and partitions. For more information on the full Hy-Lite product line, call 1-800-423-3032 or visit www.hy-lite.com.
