## **Indalex Appoints Vice President, Marketing**

Lincolnshire, IL – (May 22, 2008) – Jeffrey Knapton has joined Indalex Inc. as the company's Vice President, Marketing.

Knapton brings global industrial and consumer marketing experience and expertise to Indalex. He reports to Tim Stubbs, President and Chief Executive Officer and is a member of the company's Lead Team.

Prior to joining Indalex, Knapton was Worldwide Director, Marketing Interior Identification for the Retail Information Services (RIS) group of Avery Dennison, a global leader in pressure-sensitive technology, self-adhesive base materials, consumer and office products. He also served the RIS group as Worldwide Director, Marketing Interior/Exterior Identification and Director of Operations. He was also responsible for the division's sustainability program. He was also Worldwide Director, Marketing and Product Development for Avery Dennison's Fastener Division.

Knapton also had a variety of senior Marketing positions at Bendix Commercial Vehicle Systems where he was Director of Merchandising. He also had key Marketing roles in the Bendix Aftermarket, Bendix Brakes and Fram Heavy Duty Filters businesses.

He began his career at Proctor & Gamble Company where he had a series of Product Development and Research roles.

Knapton earned a Masters, Business Administration (Marketing and Finance) degree at the University of Cincinnati and a Bachelor of Science (Chemical Engineering) degree at Worcester Polytechnic Institute.

Indalex is the second largest producer of soft alloy aluminum extrusion products in North America. The Company's aluminum extrusion products are widely used throughout industrial, commercial, and residential applications and are customized to meet specific end-user requirements. Indalex operates 12 extrusion facilities, 33 extrusion presses with circle sizes up to 14 inches, a variety of fabrication and close tolerance capabilities, three anodizing operations, two billet casting facilities, and six electrostatic paint lines, including powder coat capability.
