

M3 GLASS TECHNOLOGIES COMMISSIONS GLASS LAMINATING SYSTEM

Irving, TX – March 21, 2008 – M³ Glass Technologies, a division of Mammen Glass & Mirror, Inc. has begun production of laminated glass this week.

After 52 years in business, the Mammen family is continuing its recent growth trend through the introduction of this new product line. M³ Glass Technologies views laminating as a value-added process that will compliment its existing products and services.

“We are excited to offer our customers a whole new range of products utilizing our lamination equipment,” said Chris Mammen, President. “We won’t be making stock sheets of lami; instead, we will be seeking out custom make-ups and unique applications – jobs that require attention to detail. For example, we can laminate multiple pieces of glass that have been routed into shapes on our CNC equipment, polished, and drilled, and the
