(TOPEKA) - The Protective Glazing Council (PGC) International today announced the next in a monthly webinar series for architects, building owners, specifiers, glazing contractors and others in the architectural community. The free monthly webinar series focuses on various industry topics and runs an hour in length. Scheduled for the last Friday of each month, the next webinar features a closer look at glass block and its use in LEED certified projects, as well as in safety and security applications. The webinar will be hosted by Peter Atherton of Pittsburgh Corning, which is known for producing top-quality glass block applications.

“Our webinar series has drawn great audiences so far,” said Brian Pitman, Director of Marketing and Communications for the organization. “Peter’s presentation adds yet another facet of information available through this wide-reaching forum. Comments from the first two webinars exceeded our highest expectations, and we look forward to providing more and more outstanding educational content.”

Atherton’s presentation kicks off at Noon EST, March 27<sup>th</sup>. To learn more and register free for this presentation, please visit the PGC International website at [www.protectiveglazing.org/webinar](http://www.protectiveglazing.org/webinar).

###

*The Protective Glazing Council (PGC) International represents manufacturers of protective glazing products and systems, suppliers to these manufacturers, consultants and testing organizations. The Association was organized to provide support to government and industry in the development of standards and specifications, as well as use of protective glazing products, for blast resistance, bullet resistance, and main force attack.*
