**Guardian goes global with www.sunguardglass.com
Website re-designed to make it more valuable for architects and
designers around the world**

Auburn Hills, Michigan (November 12, 2008) Architects and designers around the world will find an experience unique to their geography on the newly re-launched **www.sunguardglass.com**, the website for SunGuard®, Guardian's line of advanced architectural glass.

The new site is designed to support Guardian's global SunGuard program in North America, South America and Europe. The site is now available in English, French, Spanish and Portuguese.

In addition to translating the content into different languages and offering localized information, Guardian has revamped the product section to reflect how architects think when they're specifying glass: They can now search by appearance, performance and product series.

"We have found that architects and designers like to evaluate glass products based on appearance and performance," said Chris Dolan, Guardian director of commercial glass programs. "Our new website now allows for easy and quick sorting based on key criteria so the user can take whichever evaluation approach they so choose."

Visitors can now order SunGuard samples by simply clicking on the "How to Get SunGuard" button. They will be offered the opportunity to order directly from Guardian or to search for a SunGuard Select Fabricator™ in their area.

About Guardian Industries Corp.:
