Wausau Ships SuperWall in Three Weeks, in Any Color

Wausau, Wis. -- Wausau Window and Wall Systems announces three-week shipping on its standard SuperWall systems to meet the accelerated pace of construction timelines for low- and mid-rise buildings such as schools, hospitals, offices and mixed-use properties. With a palette exceeding 30,000 color choices of durable, painted or anodized finishes, these curtainwall and window wall systems are offered in 6.25- or 8.25-inch depths, and as captured or silicone structure glazed systems.

“Contractors and designers have counted on Wausau’s easy-to-fabricate SuperWall systems for smooth, quick installation and worry-free, test-verified performance. Now, they need it faster than ever and want it to match whatever color scheme the designer and owner can imagine. In just three weeks from order recipient, we can ship a complete, finished SuperWall system,” says Doug Holmberg, general manager for Advantage by Wausau’s competitively priced, standard products.

In addition, Holmberg notes that 6250 or 8250 Series SuperWall systems also contribute to energy-efficient, green building designs, achieving U-Factors as low as 0.44 BTU/hr-sqft-°F with Frame Condensation Resistance Factor (CRF) 67 to 78.

Further enhancing environmentally sound design, these aluminum systems may be specified with recycled content and can be finished with liquid paints composed of up to 100% post-industrial waste, or powder paint and anodize finishes specified as VOC-free coatings. Coupled with the recognized benefits of daylight and outside views, these features may aid buildings seeking certification under such programs as the U.S. Green Building Council’s LEED® Green Building Rating System™.

Supporting the proven performance of SuperWall systems and helping ensure prompt approval of shop drawings and calculations, Wausau’s design and submission engineering tools include AutoCAD® details, test reports, wind load charts, guide specifications, thermal models, and other instructive recommendations.

To learn more about SuperWall, and other competitively priced products with accelerated delivery, explore the Advantage by Wausau offering at <http://www.WausauWindow.com> or call 877-678-2983.

Nationally recognized for its innovative expertise, Wausau Window and Wall Systems is an industry leader in engineering window and curtainwall systems for commercial and institutional construction applications. For more than 50 years, Wausau has worked closely with architects, building owners and contractors to realize their vision for aesthetic beauty, sustainability and lasting value, while striving to maintain the highest level of customer service, communication and overall satisfaction. Wausau is a part of Apogee Enterprises, Inc., a publicly held, U.S. corporation.
