

Tubelite hires John Campbell as product development engineer

Walker, Mich. -- Tubelite Inc. adds John Campbell as a product development engineer helping expand the company's offering of architectural aluminum products for the commercial glass and glazing industry.

As part of Tubelite's engineering team, Campbell reports to Steve DeYoung, engineering manager, and works in close collaboration with manufacturing, sales, marketing and client services.

Drawing from more than 30 years of product development, design and engineering experience, Campbell previously worked for equipment manufacturers Alexander Dodds Company, Keeler Die Cast, PulverDryer USA, and GinSan Industries; contract engineer Troy Design, Inc.; powder coating specialists Servicscreen; and furniture manufacturers La-Z-Boy and Steelcase.

While with Steelcase, Campbell oversaw the company's relocation to a new facility in Grand Rapids, Mich. His contributions to the facility's design and logistics helped save Steelcase hundreds of thousands of dollars on capital costs, while achieving long-term operational efficiencies as a LEED®-certified building. According to the U.S. Green Building Council, Grand Rapids leads the nation in the number of

LEED-certified buildings per capita.

Along with training in creating sustainable, ergonomic, safe and productive workplace, Campbell earned a bachelor's degree in business from Cornerstone University in Grand Rapids, Mich. In addition, he holds associate degrees in general studies and engineering from Grand Rapids Community College. He also has completed extensive technical, computer and quality improvement/lean manufacturing coursework, and has served as a military instructor with the United States Air Force.

About Tubelite Inc.

Established in 1945, Tubelite has approximately 165 employees and is part of Apogee Enterprises, Inc. Tubelite's headquarters, distribution, warehousing and assembly operations are in Walker, Mich. Its additional facility in Reed City, Mich., houses the company's aluminum extrusion operation. Learn more at www.tubeliteinc.com.
