

Uniglass breaks into China with 250th Turbo Unit

Uniglass has now delivered more than 250 turbo units for flat glass tempering furnaces to customers around the world. The 250th unit was delivered to Saint Glas Ltd in Hong Kong, China, which represents a new area for Uniglass.

“The key to Uniglass success is our patented turbo technology used for convection in flat glass tempering. Our customers rely on this technology when tempering challenging soft-coat glass qualities,” says **Mr. Jouko Aula**, Managing Director of Uniglass. Uniglass is a Finland-based manufacturing company for flat glass tempering machinery established in 1997.

Uniglass Engineering Oy is an independent Finnish company that specializes in manufacturing tempering furnaces for flat glass. Uniglass is owned by Glaston Corporation, one of the leading corporations in the field of glass processing and related services worldwide.
