

Rethink
the possibilities

Wood ▶ Aluminum Clad

series 2600 multi-slide doors & windows

A Wood Option

Western Window Systems has long been the market leader for building aluminum multi-slide stacking and pocket doors. We have used that expertise to create a new wood ▶ aluminum clad door system that can open entire walls and expand livable space.

important features and benefits

- ▶ 1.75" panels are available in massive sizes up to 60" wide and 120" tall.
- ▶ Stainless steel bearing rollers are available in either 2.12" or the 3" Monster Roller, both of which roll incredibly smooth.
- ▶ LVL (laminated veneered lumber) cores provide strength and durability for every panel.
- ▶ Exterior cladding is made from strong, extruded aluminum.
- ▶ Exterior finishes are unlimited. All painted finishes conform to AAMA 2605 ratings using Kynar paint. For anodized finishes, both our Dark Bronze and Satin colors receive a Class 1 rating.
- ▶ Vertical stiles are available in Narrow (3.62") or Medium (5").
- ▶ Bottom rails are available in 3.62", 5", or 8" dimensions for flexibility to match sightlines of adjacent wood doors on the project.
- ▶ Interior wood is available in Pine or VG Fir, with options for custom wood species upon request.
- ▶ Panels are available in either "Contemporary" or "Traditional" styles both of which come with different stops and simulated divided lite muntins.
- ▶ Aggressive pricing that is much more competitive than Lift & Slide doors, plus our doors eliminate the need to individually rotate a gear on each panel.
