FOR IMMEDIATE RELEASE

NEW WEB SITE HELPS GLASS FABRICATORS AND SPECIFIERS MAKE INFORMED DECISIONS ABOUT ACID-ETCHED GLASS OR MIRROR PRODUCTS

Montreal, May 18, 2007 – Walker Glass Co. Ltd is launching a new web site providing easy access to key specifications on acid-etched glass or mirror products. The site has been designed to focus on product information for fabricators, architects, designers and project managers.

Ross Christie V-P Sales & Marketing says "The combinations of substrates, colours, thicknesses and finishes are endless. We have aimed at providing fabricators and specifiers all the information to make better choices."

The information available on the web site includes a white paper entitled "The Top Five Issues To Consider When Writing Acid-Etched Glass Or Mirror Specifications". It discusses issues important to the success of projects :

- The different types of acid-etch surface finish
- The different brands of glass substrates
- Acid-etch on both sides of the glass
- Finishes suitable for exterior applications
- Glass standards and warranty

To get a copy of the white paper and complete information on acid-etched glass products visit the Walker Glass web site at www.walkerglass.com.

Walker Glass Co. Ltd. is a dynamic company with over 60 years experience in the glass industry in North America. In 2003, the company started up a full surface acid-etched glass and mirror manufacturing plant, which is still today, the only one in North America dedicated to the architectural glass market. Acid-etched products are marketed under the **Walker Textures™** brand name.
